## AD VALOREM ON ALL GOODS NOT SPECIFICALLY CHARGED WITH DUTY.

1st & 2nd Schedules : Ordinance 21 of 1921.

4.—(1.) The cost of goods, for the purpose of ascertaining the amount of the *ad valorem* duty payable thereon shall be calculated, if the goods have been purchased by the importer or consignor thereof, on the price charged for the said goods by the vendor thereof as verified by the genuine invoice of such goods and if procured otherwise than by *bona fide* purchase, calculated on the actual market value or wholesale price of such goods at the time of exportation to this Colony in the principal markets of the country whence such goods were imported: Provided always that the Comptroller or the proper Officer of Customs is satisfied in the case of goods alleged to be purchased of the fact of purchase, that the entries in such invoice are true, and that the invoice is genuine in every particular, and also in the case of such goods or of goods obtained otherwise than by purchase that the price charged for the said goods as represented by the invoice aforesaid or by the entry appears to be a fair market value for such goods, at the place, and at the time that the same were purchased by the importer or consignor thereof.

(2.) No discounts or deductions from the value of any goods chargeable with *ad valorem* duty shall be allowed unless such discount or deduction be clearly shown to the satisfaction of the Comptroller or other proper officer on the original invoice or unless the same be verified by the signature of the manufacturer, merchant, or person from whom the goods set forth or described in the invoice were purchased, and by whom such discount or deduction has been or purports to have been actually allowed.

(1) Exclusive of area granted for mining purposes. (2) Includes 528 acres granted free to returned soldiers. (3) Includes office and survey fees and rent from leases and licences. (4) Balata Licences give only the right of tapping the trees to produce the gum; the areas have therefore not been included.

## REMARKS:

55 free grants were made to returned soldiers to be made absolute on the condition of continual beneficial occupation. Grants are sold in lots up to 10 acres each at 10 shillings per acre, plus survey fees and cost of preparing title, which amount to £3.2.6. Agricultural Leases are made for periods up to 99 years at rental of 10 pence per acre, plus survey fees and cost of preparing title. Grazing leases for similar periods at rental of 8 shillings and 4 pence per square mile per annum; cost of survey and preparing title extra. Grazing permissions are renewable annually at a cost of £3.2.6 per annum.

Timber leases are granted for tracts exceeding 5,000 acres for such term, at such rental and subject to such special terms and conditions as may be agreed upon, as to rental, &c., royalty to be paid on all forest products removed. Timber licences are usually for a period of 2 years and are subject, ordinarily, to a rental of 2½d. per acre per annum up to 2,000 acres, and ½d. per acre in excess of 2,000; royalty paid on products removed.

Balata licences which only permit of tapping of the balata trees extend from 5 to 15 years, annual rental £4.3.4, royalty on gum produced, filing fee with application, £1.12.4.

Bonds are required in connection with all Timber leases and Timber and Balata licences for the due performance of the conditions of the lease and as security against destruction of the forests.

(d)

The average utilization of timber from the Crown Forests for 5 years previous to 1920 was 726,220 cubic feet; this includes 122,670 cubic feet exported of which greenheart formed 77·1 per cent. The total home consumption of local and imported timber was 941,270 cubic feet of which greenheart formed 49 per cent; this includes 337,720 cubic feet of pine lumber imported from Canada and the United States of America.

For the same period the utilization of the principal forest products from Crown Lands was as follows:—

Article.	Utilization.	Exports.	Home Consumption.
Shingles	No. ... 5,686,145	2,920,862	2,765,283
Fuel, wood	tons... 78,560	7,945	70,615
Charcoal	tons... 4,556	2,530	2,026
Balata	lbs. ... 1,407,272	1,407,272	Nil

No records are available of the production of timber and other articles from private lands consumed in the Colony. Numerous enquiries continue to be received from outside sources regarding the timber resources of the Colony; but the financial depression has militated against investment of outside capital. A good deal of interest appears to have been aroused in the question of supplies of Mora (*Dimorphandra Mora* or *Mora excelsa*) for manufacture of railway sleepers; both that wood and Wallaba (*Eperua falcata*) have been proved suitable for the purpose on the local railways and large quantities of Mora sleepers have been shipped to the Barbados Government Railway. Both these woods are obtainable in large quantities. 3,319 labourers were employed in the forests in the timber industry and 3,825 in Balata tapping.

There are 6 power-driven Saw-mills in Georgetown, 4 in New Amsterdam, 1 on the Courantyne River, 1 on Canje River, 1 on Berbice River, 1 on Waini River, N.W.D., and 5 on the Essequibo River and 2 (including a water-power (Government) Mill at Christianburg) on the Demerara River. Four power-driven wood working factories are in Georgetown and one on the Demerara River. A number of saw-pits are located in various districts for cutting up timber by hand-power.

The route of the Rupununi Cattle Trail from Takama, Berbice River to Annai, Rupununi River, 180 miles long has also recently been surveyed and the country for 5 miles on each side has been mapped up to Kurupukari, Essequibo River, at 112½ miles.

The largest individual diamonds weighed respectively 21½, 18½, 17, 16½, 14, 14, 13½, 12½, 12½, 12½, 12, 12 carats  
The number of men employed in mining was about 6,000.

## 5.—WATER POWER.

The natural water power resources of the Colony are generally believed to be considerable. Kaieteur Fall on the Potaro River, the largest of the sources of potential energy, has a perpendicular drop of 741 feet with a width in the rainy season of 400 feet and is situated within feasible distance of present centres of activity. On the numerous rivers there is a number of water-falls which though not of very great height are of considerable volume. No systematic investigation of the water-power resources of the Colony has so far been attempted, but a preliminary examination has recently been made of the possibilities of some of the most accessible power sites, and it has been decided to examine in greater detail the localities indicated by this inspection to be the most promising. Meanwhile gauging stations have been installed at the following places:—Wismar and Mallali on the Demerara River; Rockstone and Tumatumari on the Potaro; and at Camaria on the Cuyuni River.

## 7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

The situation of the staple industry—Sugar—was unsatisfactory during the year owing to low prices. Prospects continued to be gloomy up to the close of the year, but it was hoped that the position was only temporary. The output was 101,128 tons as compared with 107,815 tons in 1921.

The production of gold showed a decrease on the output of the previous year due mainly to the fact that the enhanced price of diamonds attracted an appreciable number of those previously employed in gold mining.

The output of diamonds showed an increase on the previous year, the production being 816,857 stones weighing 163,640·5 carats as against 507,200 stones weighing 102,603·68 carats during last year, and 234,456 stones weighing 39,362 carats in 1920.

The production of timber and other forest products compared as follows with that of the previous year :—

		1921.	1922.
Greenheart	c.ft....	504,878	381,441
